# SCAN ME TO TAKE HOME MORE INFORMATION ABOUT THIS PRODUCT

1. On newer model phones, your regular camera app may be able to pick up the QR code straight away.

Simply open the camera, and focus straight at the QR code image over here

2. If that doesn't work, you may need to search for and download a QR Code Reader app from your phone's app store.

Position the QR code at a straight front-facing angle in your phone's camera.

If it's having trouble picking up the code, you may need to tap the screen to focus or try moving the camera further or closer to the code.
